## ABOUT ME

As a **Front-End Developer** and **Multidisciplinary Designer** with over 5 years of experience, I build scalable and responsive web applications with a strong foundation in UX and visual design.

I specialize in React-based interfaces, component-driven architecture and CMS integrations, combining technical execution with design strategy.

I have experience working with REST APIs, dynamic content and modern CSS frameworks to deliver performant, maintainable digital products.

I am organized, proactive and comfortable collaborating within multidisciplinary teams as well as working independently.

## EDUCATION

### 2023 · HENRY

Full-stack Developer

### 2020 – 2021 · EDUCACIÓN IT

UX/UI Designer & Web Designer

## WORK EXPERIENCE

### 2022 · PRESENT – FREELANCER

#### FRONT-END DEVELOPER & MULTIDISCIPLINARY DESIGNER

At PROVEN/Noteworthy I worked as a Technical Designer and Front-End Developer, focusing on:

- Development of reusable React components
- Integration with RESTful APIs to fetch and display dynamic content
- Implementation of responsive layouts using Material UI and Tailwind
- CMS-driven page building in Sanity, Shopify and Builder.io
- Dynamic forms and user interaction features
- Performance optimization and SEO improvements

I currently collaborate with Global Asset where I handle graphic design for social media and I'm currently leading the redesign of their website.

### 2021 · 2022 – COLONIA EXPRESS

#### GRAPHIC DESIGNER

Design of graphic pieces for social media using Adobe Illustrator and Adobe Photoshop. Multimedia content for social media and television using Adobe Premiere and Adobe After Effects.

### 2017 · 2018 – TEKNO HOMES

#### GRAPHIC DESIGNER

Design of presentation folders, display plotters, banners, product sheets, and advertising campaigns. Managed social media content as Community Manager, created copy and visual assets, and handled translations. Also responsible for designing and maintaining the company's website.
